

What we already own

Side view for the team: how much of the client brief is already embodied in shipped code, where we over-delivered, and how little net-new work remains to close Views Draft using existing assets.

82% Gap-close leverage	12 Surplus capabilities	78% Old HTML → built match	~1–2 wks To Views Draft green
--	---	--	---

Internal read: strong foundation, thin remaining delta

The PRDAA client gate correctly flags IA gaps. Internally, most of those gaps are composition problems — reorder nav, assemble Explore from existing blog content, trim home teasers — not greenfield features. Dining split and ANAM depth already exceed the letter of the brief.

Similarity map (three sources)

Old HTML ↔ Built		78%
Views Draft ↔ Built		52%
Old HTML ↔ Views Draft		70%
Reusable assets ↔ Remaining gaps		82%

Heuristic overlap from capability matrix. Built tracks old HTML stronger than Views Draft because Views Draft is mostly IA/nav/home restructuring on top of content already migrated.

Capability convergence

Capability	Old HTML	Views Draft	Built	Reuse
Rooms catalogue + pricing	Yes (#rooms)	Implied (Rooms nav)	Yes — /rooms + detail + rates	Complete
Dining as own destination	Section #dining tabs	Required standalone page	Yes — /dining + hours + teaser menu	High — only IA polish left
ANAM / pizza / coffee depth	In-page tabs	Menus + hours per outlet	Surplus — full anam.teatot.co.ke catalogue	Complete + exceeds
Conference / garden / catering	Separate sections	Services refocus	Yes — /services anchors + WA enquire	High — strip restaurant card
Explore Machakos attractions	#attractions + 4 spots	Dedicated page + nav + map	Partial — 3 blog posts + images exist	High — content ready, route missing
Gallery	In-page gallery	Nav item + lazy load	Yes — /gallery story groups	Complete
Contact / enquiry	Form + newsletter	Enquiry CTAs	Surplus — form + FAB + WA/SMS/tel/Messenger	Complete + exceeds
Book / pay path	Book form + M-Pesa modal	Clarify Book Now destination	BookingModal SMTP (no M-Pesa)	Medium — modal exists; label/engine TBD
Multi-page SEO shell	SPA hash	OG on Dining/Explore	Surplus — metadata, sitemap, JSON-LD, canonical	Complete for existing routes

Capability	Old HTML	Views Draft	Built	Reuse
Measurement	None observed	Not in Views Draft	Surplus — GA4 live + event hooks	Complete + exceeds

Delivered beyond the brief

Surplus	Vs client ask	Business / eng value
Dual-site dining architecture	Views Draft asked for one Dining page	Hotel teaser + full menu subdomain scales F&B without bloating hotel IA
Intent-prefixed WhatsApp	Views Draft: enquiry CTA	rooms / conference / events / dining / general prefills — conversion layer
Contact FAB (WA / call / SMS / Messenger)	Not in Views Draft or old nav	Always-on close path; matches conversion audit priorities
BookingModal + server actions	Old HTML inline book form	Accessible modal, validation, SMTP path, room prefill
Framer → typed domain pipeline	Client never asked for this	Maintainable CMS JSON → Room/Service/Blog models; UI decoupled
FAQ + FAQPage JSON-LD	Not in Views Draft	Contact/rooms trust + rich results readiness
GA4 instrumentation	Not in Views Draft	G-9B8TV2N3WT live; book_start / whatsapp_click hooks ready
ANAM menu domain model + tests	Sample dishes with photos	33 products, promotions, view-models, unit tests, selfcheck
Legal pages + thank-you	Not in Views Draft	Privacy/terms routes; form completion path
Motion / reveal / parallax system	Not required	Premium feel parity with Framer origin; reuse on Explore
Empty states + ImageWithFallback	Not required	Graceful CMS gaps; production hardening
Internal docs corpus	Not required	Parity, hosting, conversion, validation reports accelerate closes

Leverage on remaining Views Draft gaps

% = estimated share of the solution that already exists in repo/live. Effort: XS < 2h · S < 1d · M < 3d.

Build /explore page		70%
Fix nav order + add Explore		95%
Homepage Dining + venue teasers		80%
Slug rename + redirects		75%
Drop restaurant from Services		90%
Image compression		40%
Book Now clarity		85%

Remaining gap	Already in hand	Effort
Build /explore page	3 attraction posts + cover images (OI Donyo, People's Park, Kyamwilu); Wamunyu asset; MapEmbed; RevealSection; sitemap helper	S–M
Fix nav order + add Explore	navLinks single source in lib/navigation.ts	XS
Homepage Dining + venue teasers	Services CMS cards, Flavours copy, /dining and /services routes, ParallaxImage	S

Remaining gap	Already in hand	Effort
Slug rename + redirects	Titles already match; generateStaticParams; blog image filenames already attraction-named	S
Drop restaurant from Services	enquireFor() + slug anchors; ANAM external link pattern on home	XS
Image compression	Next/Image pipeline; asset tree known; heavy files identifiable	S
Book Now clarity	BookingModal + WhatsApp intents; only copy/CTA strategy needed	XS

Two-site asset inventory

teatot.co.ke (hotel)

Routes: /, /rooms[+slug], /dining, /services, /gallery, /about, /contact, /blog-posts/[slug], /legal-page/[slug], /thank-you

Systems: Navigation, BookingModal, ContactFab, Analytics/GA4, Hotel JSON-LD, FAQ, WhatsApp intents, Frammer normalize/data layer, sitemap

Docs: PARITY, HOSTING, DEPLOYMENT, VALIDATION, DIGITAL-CONVERSION-AUDIT

Status: Live production

anam.teatot.co.ke (menu)

Routes: /, /menu, /about, /blog[+slug], /contact-form, privacy, terms

Systems: Catalogue domain (families/products/promotions), view-models, filter hash, Restaurant JSON-LD, GA component, unit tests + selfcheck

Linked from hotel Dining + home ANAM card — fulfills “menus with photos” deeper than a single hotel page would

Status: Live production

Internal narrative vs client narrative

Client gate (PRDAA)

Focus: did we ship the restructuring plan? Answer: not yet — Explore missing, home still mixed, nav/slugs wrong. Score ~62; Significant Rework.

Internal gate (this audit)

Focus: is the product system ready to absorb that plan cheaply? Answer: yes — dining/ANAM/services/contact/measurement already exceed; remaining work is mostly IA assembly. Estimated 1–2 weeks to Views Draft green with current assets.

What not to rebuild

- Do not rebuild Dining — extend home teaser to point at existing /dining + ANAM.
- Do not invent new attraction copy first — promote existing three posts into /explore; add Wamunyu as fourth card from existing image.
- Do not replace BookingModal for Views Draft “clarify Book Now” — change label/copy or secondary WA CTA; engine/M-Pesa is a product decision, not a missing page.
- Do not merge ANAM back into hotel — dual-site is surplus that already satisfies menu depth; only tighten parent-brand cross-links.

- Do not rewrite Services content — filter/hide restaurant + guest-services presentation; keep conference/garden/catering enquire pattern.

Internal scorecard

9/10 Asset readiness	8/10 Surplus value	7/10 Close-the-brief speed
6/10 IA alignment today	8/10 Conversion stack	5/10 Main-site test harness

Recommended internal posture

Treat Views Draft remaining items as a short IA sprint on top of a finished platform — not a second build. Keep PRDAA as the external acceptance checklist; use this surplus map for sequencing and scope control (deletion over reinvention).

Stance: delivery team advocate. Celebrates shipped surplus without disputing client-facing gaps. Source canvas: internal-delivery-surplus-audit.canvas.tsx · Companion client audit: prdaa-implementation-audit.canvas.tsx Confidence: grounded in prior live/repo audit · Effort estimates are planning, not quotes.
